<b>3.30 – 3.40</b>	Concluding remarks	

### BEGINNERS WORKSHOPS

These workshops are aimed at both beginner raters and individuals new to working with Huntington's disease, either directly or indirectly, to give them an understanding of the disease by demonstrating the tools used by clinical staff to measure the progression of the disease. For those currently doing patient ratings, these workshops will not lead to any official rating certificate; instead it aims to build upon existing knowledge of HD.

### ADVANCED WORKSHOPS

These workshops are aimed at all experienced staff who deal with HD patients in the clinic and community, to strengthen existing knowledge and allow discussion with peers in a stimulating environment.

### COSTS

There is no charge for the training day which is part-funded by DeNDRoN. Lunch will be provided. Before registering, attendees should ensure that their organisation will cover any additional costs incurred in travel and accommodation.

### REGISTRATION

To register, please email Anne-Marie McGorrian ([mcorriona@cardiff.ac.uk](mailto:mcorriona@cardiff.ac.uk)) by May 31<sup>st</sup> with the following information:

- Name
- Job Title
- LRN
- Email Address
